

# Polish Maps Through History

This document shows all the maps we have of Poland's changing borders throughout history. It's organized to help you easily see when borders changed and which maps are the same.

## What This Document Shows:

### Year

The year of a map showing Poland's borders at that time.

**Example:** 1772, 1918, 1945

### Variation

Sometimes borders changed multiple times in a single year, so we have different maps for the same year.

- 1 One change within the year
- 2 Two changes within the year
- 3 Three changes within the year

### Map Groups

Sometimes maps from different years show exactly the same borders. These are grouped together.

**Example:** 1948, 1951, 1960, 1970, 1975, 1980, and 1985 all show the same borders
